AREA OF INTEREST

- Java - Spring
- MongoDB
- Oracle
- Kafka
- Salesforce
- Microservices
- ReactJS

EDUCATION

Bachelor of Engineering
Electronics and communication
Anna University (Aff),
SKCT, Coimbatore, TN.

DOMAIN SKILLS

Healthcare

- Anthem Inc., - CTS

ROLES

- ➔ Lead Software Engineer
- ➔ Sr. Software Engineer
- ➔ Software Engineer
- ➔ Programmer Analyst

OBJECTIVE

Seeking for a position as a Lead Java Developer in a reputed company that will utilize and further enhance my knowledge of IT, and offer advancement opportunity.

ABOUT ME

- Over 11 years of experience in Healthcare domain and played a key role in complex web based J2EE applications and Spring Microservices to interact with Legacy systems.
- Designed and coded application components in an Agile environment utilizing a test-driven development approach.
- Superior knowledge in Spring Java/J2EE and web services.
- Worked closely with system analyst, testers and product owners to identify features the application needs to contain to write stories of functionality to complete.
- Involved in all phases of the life cycle from low-level design and development and post-production support.
- Provided programming estimates, identified potential problems and recommended alternative solutions.
- I'm a self-starter, adept at picking up new skills and technologies, and eager to break new ground.

TECHNICAL SKILLS

Java Technologies

- Java, Spring boot Microservices, Junit, Web Services (SOAP, REST), Spring Core, Spring Batch, Spring MVC, Kafka.

Web Technologies

- HTML, CSS, JavaScript, JQuery.

AI Tools

- Github Copilot.

SERVERS

- Tomcat, WebSphere, Node JS, AWS Cloud

DATABASES

- Oracle 10g, MySQL, MongoDB.

TOOLS

- Spring Tool Suite, RoboMongo, Visual code studio, Postman, Sonar, Checkmarx, Eclipse, RAD 8.5, Soap UI.
- Atlasian's JIRA, Bitbucket, Bamboo, Confluence.

HACKATHON

Block-Chain based Broker
Credentialing - July, 2018
2nd Runner-up

Developed an Ethereum based decentralized application using Solidity.js and web3.js that allows the broker to register his details onto the block chain. The state authority then validates the broker's certificates and makes it available to the Payers for on-boarding the broker.

EXPERIENCE

Anthem Inc.,
Cognizant Technology Solutions

Project: FOA - Saleshive
Duration: Jan 2022 to till date

Anthem Inc., is the largest publicly traded commercial health benefits company in the United States. It provides health insurance and services, primarily under the Blue Cross and Blue Shield names. It also offers related services including dental coverage, life insurance and pharmacy benefits management. Anthem, Inc. was formed through the 2004 merger of Anthem and Anthem Health Networks.

Project Description:

SalesHive is an event-driven, Java-based microservices system that acts as an intermediary between the Salesforce UI and downstream mainframe systems. It enables brokers to enroll groups of subscribers into the downstream enrollment platform. The SalesHive application consists of multiple microservices that communicate through events, using Kafka as the messaging queue. These services exchange data as events, process it, and then forward the enriched information to other dependent systems.

Responsibilities:

- Involved in Project Management Activities. Requirement Analysis, Documentations of Technical Specifications.
- Develop high quality code adhering to standard design patterns.
- Estimate level of effort for assigned tasks, raise risk early on deliverables.
- Perform peer code reviews to ensure proper coding practices are followed and to improve code quality.
- Partner with Business Analyst, Technical Lead and QA in Agile sprints to deliver outcomes for sprint demos.

- Experienced working in a structured release management environment, including change and release management as well as scrum methodologies for managing high volume work requests.

Technology stack:

- Java Spring
- Microservices
- Kafka
- MongoDB
- Junit
- AWS Cloud

Tools used:

- Spring Tool Suite
- Robo Mongo
- Openshift AWS
- Postman
- Sonar
- Bitbucket
- Bamboo
- Jira

Anthem Inc.,

Cognizant Technology Solutions

Project: SFOA - Salesforce

Duration: Feb 2015 to Jan 2022

Project Description:

Small Group Front Office Automation, allows the broker to create quote and generate proposals for small group on the Force.com platform. SGFOA follows the relative development by utilizing a toolkit of Force.com, Conga Composer, a Salesforce document generating toolkit.

Responsibilities:

- Involved in application development life-cycle activities that include: Analysis, Design, Coding, Testing and Implementation.
- Document and develop code in APEX according to specifications and standards.
- Creation and modification of Custom Salesforce Objects.
- Customize applications by making the best use of point-and-click capabilities of the Force.com platform in adherence with the customer's specifications.
- Provide support for quality assurance testing and defect resolution.
- Execute all phases of software application projects including resolving issues and helping to ensure successful deployment.
- Executed following Agile Scrum disciplines.

Tools used:

- Salesforce
- Conga Composer
- Apex
- Conga Queries
- Conga Templates

Anthem Inc.,

Cognizant Technology Solutions
